

HV Test Equipment

DEHNcap/P Voltage Indicator

Description:

For nominal voltages up to 45kV/50Hz in accordance with IEC 61243-5.
Passive indicators for verifying safe isolation from supply.

May be installed as permanent voltage indicator.

Technical Data:

System	HR
Indication threshold	90V
Input impedance	36 Megohms
Nominal frequency	50 Hz
Plug spacing	19 mm

Degree of protection:

For enclosure	IP66
---------------	------

Indications:

Self-test/	None
Ready for operation	
No voltage present	No LED
Voltage present:	Flashing red LED, minimum frequency 1Hz

CODE	TYPE	DIMENSIONS mm	WEIGHT g
767 101	HR	42 x 48 x 35	60
