

Portable Earth Set Tester

Field Testing of Portable Earths

Description:

The GET-40 is an easy to use and accurate Portable Earth Tester using an exclusive, low current technique.

The GET-40 is a portable instrument equipped with a micro-ohmmeter with a very wide measuring range.

Battery-powered for portability, the GET-40 is a one-touch instrument which is easy to use.

Features:

- Guarantees your portable earth set integrity
- Measurement includes clamps, contacts, and connector lugs
- Works with all types of clamps
- Adaptable to other type of clamps or connectors
- Full automatic, microprocessor based
- One-touch reading, no calculation required
- Portable, battery operated
- 4 digit display for high precision

Technical Specifications:

- Precision: 0.1% of the reading
- Measurement Range: 0.01 $\mu\Omega$ to 200 Ω
- Resolution 4 3/4 numbers
- Standard rechargeable NIMH batteries
- Rechargeable Battery endurance: + 5000 measurements at 5A
- Display: Liquid crystal 128 x 64 dots, 2 back-light intensities

Operation:

- The GET-40 to read Portable Earth Set Tester uses the four terminal measurement method
- The GET-40 electrodes interface with the DRM-40 micro-ohmmeter in a manner to provide you with easy "point to point" Portable Earth Set resistance measurement
- DRM-40 micro-ohmmeter can be used for general four terminal resistance measurement applications

Code: GET-40
