

Insulating Sticks

LitFinger™ Operating Heads

LITFinger™

LITLINK™

Description:

The LITFINGER™ is a universal switching head with a built-in bright 1 watt dual intensity LED light to illuminate the work area during night-time operations. The LED is very reliable eg. it remains operational after a 3kV, 8kA/0.5 second arc blast test. It is water-resistant to a depth of 1m. Replaceable alkaline batteries are supplied with each unit. Also available with sunrise fittings at both ends is the LITLINK™.

Features:

- Standard head fits all standard operating sticks with universal or sunrise connector.
- Robust lightweight plated die-cast aluminium case.
- A sealed borosilicate heat & flash resistant window protects an unbreakable 1 watt LED bulb that never needs replacing.
- Maximum brightness 15 lumens (high range), 7 lumens (low range)
- Approx burn time 4 hours (high range), 10 hours (low range).
- LED life approx 50,000 hours.
- Water resistant battery compartment and sealed silicone rubber push button for LED.
- “Off-Hi-Low” Switch for increased battery life.

Weight: 200g (with 3 x AAA batteries)

Code: LITFINGER
