

Insulating Covers

Orange Neoprene Drape 1000V

Description:

Made of flexible orange neoprene rubber, complying with VDE 0670, Part 1, paragraph 3.8 and suitable for voltage levels not exceeding 1000V AC. Applied as a blanket or wrapping on or around conducting mains, apparatus, surfaces and pipes so as to prevent inadvertent contact and provide an electrically safe barrier for personnel or equipment working in the vicinity. Full rolls are 10m and standard cut lengths are available. Smooth finish both sides. Refer to page 8 in this section for fastening devices. 1000V insulation.

Not to be used as an insulating floor or ground mat.
