

## Pipehorn® 800-HL

### Dual Frequency Pipe and Cable Locator

---

#### Description:

The Pipehorn Series 800-HL is a state-of-the-art, dual-frequency, pipe and cable locating system designed for the professional with complex locating jobs. It is a carefully engineered, precision instrument. The Pipehorn 800-HL operates as a low-frequency conductive locator and as a high-frequency inductive or conductive locator. It can be used to locate and trace all types of buried or concealed conductors such as: pipe, cable tracer wire, traceable fiber optics, or even sewer snakes or fish tape inserted into non-conductive pipe.

This equipment is used to locate and trace all types of buried or concealed conductors such as: pipe, cable tracer wire, traceable fiber optics, or even sewer snakes or fish tape inserted into non-conductive pipe. The 800-HL has an audible response as well as a visual response to help verify the locate and to help give an estimated depth.

#### Features:

- Easy to use
- Operates in both inductive and conductive modes
- Extremely robust
- Audible and visual response
- Switches from one frequency to the other
- receiver shows signal strength
