

## Insulating Tools - Side Cutters

### Plain Head & Insulated Side Cutters

**Description:**

Made of special tempered tool steel with inductively tempered blades suitable for hard or soft conductor. Cutting power is approximately 62HRc. The insulated side cutters polished chrome head is coated with 1.5mm thick transparent and highly flexible insulation. Maximum opening angle is 30°. 1000V insulation.

| CODE   | TYPE      | LENGTH<br>mm | MAX DIAMETER<br>mm | WEIGHT<br>g |
|--------|-----------|--------------|--------------------|-------------|
| 236316 | plain     | 160          | 4                  | 235         |
| 236318 | plain     | 180          | 4                  | 260         |
| 236516 | insulated | 160          | 4                  | 230         |
| 236518 | insulated | 180          | 4                  | 260         |

### Power Side & Heavy Duty Cutters

**Description:**

Made of tempered chrome vanadium steel with inductively tempered blades. The polished chrome head has a tempered pivot for maximum strength. The power side cutter is suitable for cutting piano wire steel up to 3mm diameter. Cutting power is approximately 64HRc. 1000V insulation.

| CODE   | TYPE       | LENGTH<br>mm | MAX DIAMETER<br>mm | WEIGHT<br>g |
|--------|------------|--------------|--------------------|-------------|
| 237320 | power side | 200          | 4                  | 340         |
| 237325 | power side | 250          | 4                  | 460         |
| 236326 | heavy duty | 260          | 4* / 2.5#          | 460         |
