

OH Line Stringing

Single Wire Lifting Device

Description:

Manufactured from powder coated steel and designed as a manual lifting aid to install or replace single wire HV conductors onto 11 & 22 kV pin type porcelain insulators. The device attaches to both the metal insulator pin and porcelain insulator and adjusts vertically for varying insulator heights. A swivelling pulley block with a side opening gate is provided for a hauling rope. Rope is not supplied with the device. Operating instructions are supplied with each device. W.L.L. 250kg. Not suitable for live working.

Weight: 6.4kg

Code: SWLIFT
