

T-Mac® Portable Earthing Equipment

Switchgear Portable Earthing System

Description:

The patented **T-Mac®** Switchgear Portable Earthing Device is an extendable single-pole portable assembly for earthing orifices of vertically-racked metalclad HV switchgear.

Features:

- Adaptable to most types of vertically-racked indoor metalclad HV switchgear
- Quick-adjusting locking mechanism for easy extension
- Coarse-thread screw-in operation to fix contacts firmly in place
- Removable contact assembly for ease of storage and handling
- One mechanism set may be used with several contact sets for different switchgear
- Clear PVC-insulated braided copper short-circuiting cable
- Lug or earth clamp provided to user requirements
- Type tested in accordance with IEC61230 to confirm short circuit rating
- Assembly may be customised to individual requirements
- Non-slip foot for concrete or metal panel floors

Weight: 8kg (per pole with 1m x 95mm cable)

Code: Allocated upon enquiry
