

T-Mac® Data Loggers

For Customers, Supply Networks and Earth Systems

FLEXI-LOGGER

Description:

The Flexi-Logger is a portable maximum demand indicator with the ability to record load for up to 14 days. The Flexi-Logger can be used WITHOUT A PC. It has been designed for use in overload checks on transformers and cables.

Features:

- Easy to use
- Weatherproof – suitable for pole top use.
- Robust
- Flexible C.T.'s for ease of installation
- Can be used without a PC
- Data analysis software is included with the units

Operation:

Clip the flexible C.T.'s around the cables to be measured, leave for up to 14 days, read the maximum demand from the LCD screen, or download to a PC if required.
