T-Mac™ Temporary LV Crossarm

Description:

The T-Mac™ Temporary LV Crossarm is designed to support LV conductors while a wood crossarm is removed and replaced.

Developed in conjunction with a leading Australian utility, it enables the changeover operation to be carried out quickly and safely while the line remains live.

Benefits:

- Light-weight - suited for single-person operation
- Attached to pole using a ratchet strap
- Versatile - can be used for intermediate or strain structures
- High quality insulating fibreglass
- No supply interruption
- Quick, easy and safe
- Contributes to reducing costs and increasing productivity

Weights, Ratings and Codes:

CODE	CROSSARM 1.8	CROSSARM 2.1	CROSSARM 2.4	CROSSARM 2.7
Arm Length mm	1800	2100	2400	2700
Weight kg	13.0	13.7	14.4	15.1
Max working load per attachment point kN	3.2	2.6	2.19	1.89

Refer to Working Instructions supplied with each device for more details on ratings.
