

Insulating Covers

Transparent Drape 1000V

Description:

Made of highly flexible UV resistant transparent plastic, complying with VDE 0680, Part 1/01.83 and suitable for voltage levels not exceeding 1000V AC. Applied as a blanket or wrapping on or around conducting mains, apparatus, surfaces and pipes so as to prevent inadvertent contact and provide an electrically safe barrier for personnel or equipment working in the vicinity. Full rolls are 50m and 10m. Standard cut lengths are 2m and 1m. Refer to page 8 in this section for fastening devices. Smooth finish both sides. 1000V insulation.

Not to be used as an insulating floor or ground mat.
